

Of course. Here is the analysis for Chapter 1 of "The Adam and Eve Story" by Chan Thomas.

Chapter 1: The Next Cataclysm

Key Characters Introduced or Mentioned:

- **Noah** ¹
- **Adam and Eve** ²
- **Jesus** ³
- **Osiris** ⁴
- **Ta'aroa** ⁵
- **Zeus** ⁶
- **Vishnu** ⁷
- (Mentioned as figures who, along with civilizations like Atlantis and Mu, become legends after the cataclysm). ⁸

Key Locations Mentioned:

- **California (Los Angeles & San Francisco):** Buried by a mountain of seawater more than two miles high. ⁹⁹⁹
- **North and Central America:** Annihilated by wind, earth-fire, and inundation. ¹⁰
- **South America (Ecuador, Peru, western Brazil):** Devastated by earthquakes, piled high with water from the Pacific, burned by molten earth-fire, and then instantly turned into a "frozen hell." ¹¹¹¹¹¹¹¹
- **Europe (Alps, Pyrenees, Urals):** Mountains are heaved higher by the impact of the raging Atlantic. ¹²
- **Africa (Zaire, South Africa, Kenya):** Experiences severe earthquakes and winds, but little flooding. Survivors here witness the Sun standing still in the sky for nearly half a day.

- **Eastern Siberia, Manchuria, China, Burma:** Suffer annihilation from wind, earth-fire, inundation, and a sudden, paralyzing freeze. ¹⁴
- **Antarctica and Greenland:** Their ice caps are moved to the Torrid Zone where they melt rapidly. ¹⁵¹⁵¹⁵
- **Bay of Bengal basin:** Becomes the new North Pole. ¹⁶
- **Pacific Ocean (west of Peru):** Becomes the new South Pole. ¹⁷
- **Egypt:** What's left of it emerges from the inundation, new and higher. ¹⁸

Key Events & Stories:

This chapter provides a dramatic, narrative forecast of the next global cataclysm. The event begins with an unprecedented earthquake that causes the Pacific Ocean to pile up into a two-mile-high wall of water. ¹⁹This is accompanied by thousand-mile-per-hour winds that shred everything in their path. ²⁰The massive wall of seawater races eastward across North America, burying the continent from coast-to-coast in under three hours. ²¹In many places, the Earth's molten sub-layer breaks through the surface, spreading seas of fire. ²²South America and Eastern Asia suffer a similar fate but are also subjected to an instantaneous, deep freeze that preserves shredded animal remains in piles of mud. ²³²³²³²³

The cataclysmic rampage of wind and water continues for six days. ²⁴During this time, the Earth's poles have shifted, moving Greenland and Antarctica to the equator. ²⁵Their ice caps melt in less than 25 years, causing the world's oceans to rise over two hundred feet. ²⁶On the seventh day, the event is over, and a new stone age begins for the few survivors. ²⁷²⁷²⁷All modern cities are gone, becoming mere legends. ²⁸²⁸²⁸

Key Concepts & Esoteric Knowledge:

- **Pole Shift:** The fundamental mechanism of the cataclysm is a rapid shift of the Earth's crust, which moves the polar regions to the equator. ²⁹
- **Supersonic Winds and Inundation:** The atmosphere and oceans do not shift with the crust; their continued momentum creates supersonic winds and continent-covering floods. ³⁰³⁰³⁰³⁰
- **Earth-Fire:** During the upheaval, the molten layer beneath the Earth's crust breaks through to the surface in many areas. ³¹

- **Instantaneous Freeze:** Some regions of the planet are subjected to a sudden and extreme temperature drop of 180°F, flash-freezing everything.³²
- **Cyclical Destruction:** The cataclysm is presented as a recurring event that acts as a "population regulator," wiping the planet clean of civilization when humanity "refuses to do for himself" what is necessary for the planet.³³
- **The New Stone Age:** The destruction is so total that the few survivors are driven back to a primitive existence.³⁴³⁴³⁴

Alleged Time Stamps or Historical Periods:

- The chapter is set in the future, describing the "Next Cataclysm."³⁵
- The main destructive event lasts for **six days**, with the oceans beginning to settle on the **seventh day**.³⁶
- The polar ice caps are predicted to melt in **less than twenty-five years** following the shift.³⁷

Direct Quotes of Significance:

- "In a fraction of a day all vestiges of civilization are gone, and the great cities - Los Angeles, San Francisco, Chicago, Dalias, New York, Boston - are nothing but legends."³⁸
- "The greatest population regulator of all does once more for man what he refuses to do for himself and the planet on which he lives, and drives the pitiful few who survive into a new stone age."³⁹

Of course. Here is the analysis for Chapter 2.

Chapter 2: The Great Floods

Key Characters Introduced or Mentioned:

- **J. Andre DeLuc and Georges Cuvier:** Early 19th-century scientists who are presented as the foremost proponents of the theory that the Earth's surface has undergone sudden, cataclysmic revolutions¹.
- **Dolomieu, Escher, Forel, and Von Buch:** Other mineralogists and geologists who agreed with the theory of sudden cataclysms².

- Prof. Frank C. Hibben:
A modern challenger to mainstream geology, quoted for his work on the catastrophic and widespread death of millions of animals in Alaska and Siberia³³³³³³³³.
- **Noah (Utnapishtim):** Mentioned as a real historical figure, a Sumerian named Utnapishtim who survived the cataclysm that occurred around 7,000 years ago⁴.
- **Osiris:** Described as a historical man from Egypt who lived approximately 15,000 years ago and was the "Jesus of his time"⁵.
- **Vishnu:** Identified as a man who lived through a cataclysm many thousands of years ago and is now known as the Hindu god of ten resurrections from the waters⁶.

Key Locations Mentioned:

- **Alaska:** The location of "muck pits" filled with the bones and debris of countless animals, evidence of a universal, catastrophic death⁷⁷.
- **Siberia:** A site of "universal death" where mammoths and other animals were found torn, twisted, and quick-frozen⁸⁸⁸⁸.
- **Grand Canyon, Painted Desert, Monument Valley:** Locations where the deep layers of mud laid down by the "great homogenizers" (the oceans) are exposed⁹. Their homogenous strata are cited as proof of sudden deposition by water¹⁰.
- **Tiahuanaco, Bolivia:** A prehistoric city where all work suddenly ended 11,500 years ago, cited as evidence of a cataclysm¹¹¹¹.
- **Niagara Falls:** The 7,000-year age of the gorge below the falls is used as evidence for the date of the last cataclysm (Noah's flood)¹²¹².

Key Events & Stories:

This chapter tells the story of the scientific pursuit of the cataclysm theory. It begins by citing early 19th-century geologists like Georges Cuvier, who argued that the Earth's strata and fossil records prove the planet has suffered "great and sudden" revolutions¹³. The author then describes being "tormented" by Cuvier's challenge to find the cause of these events and his own research journey, which began in 1949¹⁴¹⁴¹⁴¹⁴.

The narrative explains the physical mechanism of the cataclysm. Every few thousand years, the magnetic and electrical order within a 60-mile-thick molten layer of the Earth is

disrupted¹⁵¹⁵¹⁵¹⁵. This allows the layer to act as a lubricant, enabling the immense centrifugal force of the off-axis polar ice caps to pull the entire solid shell of the Earth around its interior¹⁶¹⁶¹⁶¹⁶. This shift of the crust happens in a quarter to half a day, while the atmosphere and oceans continue their eastward momentum at over 1,000 mph, causing supersonic winds and continent-spanning floods that destroy everything¹⁷¹⁷¹⁷¹⁷. The chapter culminates in a chart listing the last five North Polar Eras, dating the cataclysms that ended each one.

Key Concepts & Esoteric Knowledge:

- **The Cataclysm Mechanism:** The Earth's 60-mile-thick outer shell slips over a 60-mile-thick molten sub-layer that acts as a lubricant¹⁸¹⁸¹⁸¹⁸. This is caused by the centrifugal force of the growing, off-axis polar ice caps pulling the shell around the Earth's interior¹⁹¹⁹¹⁹¹⁹.
- **The Role of Magnetism:** The molten sub-layer normally acts as a near-solid plastic because of the Earth's internal "magnetic and electrical structure"²⁰. A cataclysm is triggered when this structure is disrupted, allowing the layer to become a free liquid²¹²¹²¹²¹.
- **Sudden Ice Ages:** The theory posits that ice ages are not caused by advancing and retreating glaciers, but by different areas of the Earth being abruptly shifted into a polar region for thousands of years²².
- **Homogenous Strata:** The perfectly flat, even layers of sediment seen in places like the Grand Canyon are presented as definitive proof that they were deposited "all at once" by catastrophically violent, supersonic water²³²³²³²³.
- **Quick-Frozen Animals:** The discovery of mammoths and other creatures flash-frozen in Siberian and Alaskan muck is a key piece of evidence²⁴. The animals were torn apart by "supernatural winds," suffocated in muck from massive floods, and then instantly frozen by a precipitous temperature drop²⁵.

Alleged Time Stamps or Historical Periods:

- **7,000 years ago:** The approximate date of the last cataclysm, Noah's Flood²⁶²⁶²⁶²⁶. This era began the Arctic Ocean polar cycle²⁷²⁷.
- **11,500 years ago:** The date of the "Adam and Eve" cataclysm, which ended the

Laurentian Basin ice cap and the civilization at Tiahuanaco²⁸²⁸²⁸²⁸. This was the start of the Sudan Basin polar cycle²⁹²⁹.

- **18,500 years ago:** The date of the cataclysm that ended the Hudson Bay polar cycle³⁰³⁰.
- **29,000 years ago:** The date of the cataclysm that ended the Wisconsin ice cap and the Caspian Sea polar cycle³¹³¹³¹³¹.
- **35,000 years:** The span of time for which the author claims his cross-correlation of data has mapped the different positions of the Earth's shell³².

Direct Quotes of Significance:

- (Quoting Georges Cuvier) "...if anything in geology be established, it is, that the surface of our globe has undergone a great and sudden revolution, the date of which....cannot be....much earlier than five or six thousand years ago..."³³.
- "In one quarter to one half a day, the geographic poles move to the Torrid Zone, and all hell lets loose"³⁴.

Of course. Here is the analysis for Chapter 3.

Chapter 3: The Story

Key Characters Introduced or Mentioned:

- **Adam and Eve:** The central figures of the story, reinterpreted not as the first humans, but as survivors of a cataclysm 11,500 years ago¹. Based on a re-reading of ancient glyphs, Eve is presented as Adam's daughter from his deceased first wife, Lilith²².
- **Moses:** Believed to be the originator of the Genesis account in the Old Testament³. Having been raised in the Egyptian royal household, he likely had access to ancient records but, not understanding the symbolic Naga language, he read the glyphs literally and projected the patriarchal attitudes of his time onto the story⁴⁴⁴⁴⁴⁴⁴⁴.
- **Ezra:** The Hebrew chief priest who, in 458 B.C., was commissioned to rewrite the Old Testament from memory after the original records were burned in the sacking of Jerusalem in 586 B.C.⁵⁵⁵. This act further solidified the literal, and allegedly incorrect,

interpretation⁶.

- **James Churchward and Don Antonio Batres Jaurequi:** Cited as experts in prehistoric languages like Naga and ancient Mayan, whose knowledge provides a key to correctly interpreting the Adam and Eve story⁷.
- **Lilith:** Mentioned from legend as the name of Adam's deceased first wife and, according to a reinterpretation of a Naga creation glyph, the mother of Eve⁸.

Key Locations Mentioned:

- **Egypt (Heliopolis, Sais):** Ancient archives in Egypt are suggested as the source from which Moses derived the story of Adam and Eve⁹⁹⁹⁹.
- **Jerusalem:** The location of the temple where all the original Hebrew laws and records were burned by Nebuchadnezzar's forces in 586 B.C.¹⁰.
- **Garden of Eden:** Interpreted not as a physical garden, but as a "mother continent," a parent civilization symbolized by the "tree of life"¹¹¹¹¹¹.

Key Events & Stories:

This chapter details the author's investigation into the true meaning of the Adam and Eve story. The central event is the re-framing of the biblical narrative as a history of a cataclysm. The author posits that Genesis I describes the aftermath of the global catastrophe that occurred 11,500 years ago¹²¹²¹².

The narrative then traces the story's transmission through history. It was originally recorded in the symbolic picture-language of Naga on a "mother continent"¹³¹³. Thousands of years later, Moses accessed these records in Egypt and, misunderstanding the glyphs, created a literal interpretation that also cast Eve as the cause of sin, reflecting the misogynistic views of his era¹⁴¹⁴¹⁴¹⁴. The written Hebrew records were later completely destroyed in 586 B.C.¹⁵. A century later, the priest Ezra reconstructed the entire history from memory, creating the version of Genesis we know today¹⁶.

The climax of the chapter is the author's own reinterpretation of the story based on Naga glyphs. He concludes that the story is not about original sin but about survival. Eve, Adam's daughter, inherited the wisdom to foresee the continent's destruction by flood and earthquake. They left the doomed land and, following an ancient Hebrew law for catastrophe

survivors, mated to ensure the continuation of their lineage¹⁷¹⁷¹⁷¹⁷.

Key Concepts & Esoteric Knowledge:

- **Genesis as a Cataclysm Account:** The core theory is that Genesis I is a literal description of the Earth recovering in the seven days following a global inundation 11,500 years ago¹⁸¹⁸¹⁸¹⁸.
- **Naga Language:** The story was originally written in Naga, a prehistoric, symbolic picture-language nearly identical to ancient Mayan¹⁹. Misinterpretation of these symbols is the source of the biblical story's errors²⁰.
- **Reinterpretation of Glyphs:**
 - **Tree of Life:** A mother continent or parent civilization²¹.
 - **Serpent:** The ocean; entwined around the tree, it means the continent was surrounded by water²².
 - **Fruit:** The original inhabitants of the motherland; eating the fruit means being descended from them²³.
 - **Cherubims:** Glyphs representing the foundations of the land; their removal means the continent lost its foundations and sank²⁴²⁴²⁴²⁴.
 - **Flaming Sword:** A symbol for fiery earthquakes and "earth-fire" (molten lava) breaking through the crust²⁵.
 - **Adam's Rib:** A misreading of a Naga glyph showing curved lines that actually denote parentage, not ribs²⁶²⁶²⁶²⁶. The glyph depicts Adam's deceased wife (Lilith) and their daughter (Eve)²⁷.

Alleged Time Stamps or Historical Periods:

- **11,500 years ago:** The cataclysm that the Adam and Eve story is believed to record²⁸. The civilization of that time used the Naga language²⁹.
- **7,000 years ago (approx.):** The time of Noah's Flood³⁰.
- **1,300 B.C.:** The approximate time of Moses's brother, Aaron³¹³¹³¹³¹.
- **586 B.C.:** The year Jerusalem was sacked and the Old Testament records were

burned³².

- **458 B.C.:** The year Ezra began rewriting the lost scriptures from memory³³.

Direct Quotes of Significance:

- "If the story were taught as the truth so uniformly, in spite of its apparent divergence from scientific truths, then to me the true course would seem to be a search for the foundation of the story, which would then lead to a true reading of it."³⁴
- "So, in essence, the story as read from the glyphs would be that Adam and Eve, who lived in the Garden of Eden on the mother continent (tree), were descended from the original mankind (fruit) of that land...They realized that, in order to survive, they had to leave and never try to return, for the motherland was destined to be destroyed by a cataclysmic inundation."³⁵³⁵³⁵³⁵

Of course. Here is the analysis for Chapter 4.

Chapter 4: THE EVENT: 11,500 Years Ago

Key Characters Introduced or Mentioned:

- **Captain Cook:** Mentioned for his discovery of the Maori tribe in New Zealand in the 1700s¹.
- **Maori people:** A Polynesian tribe who told Captain Cook of ancient legends about Saturn's rings, despite having no telescopes².
- **Ta'aroa (or Tongaroa/Taroa'a):** A figure from Pacific legends who survived a cataclysmic flood³. The author suggests the Adam and Eve story could have sprung from the same origin⁴.

Key Locations Mentioned:

- **Hudson Bay:** The location of the North Pole between 18,500 and 11,500 years ago⁵⁵⁵⁵.
- **A lost continent in the Atlantic:** A huge landmass that stretched from England to the Bahamas⁶⁶⁶. After the cataclysm, only a large island remained, and the ocean to the east became shallow and impassable⁷.

- **A lost continent in the Pacific:** An ancient landmass ringed by the modern-day Hawaiian Islands, Galapagos, Easter Island, and others⁸⁸⁸. It almost completely disappeared, with its remains rolling to the new South Pole to become a "frozen reservoir of mud"⁹.
- **Tiahuanaco, Bolivia:** Described as a prehistoric metropolis and seaport that was at sea level before the cataclysm¹⁰. Its astronomers used telescopes and tracked a satellite orbiting the Earth 449 times per year¹¹¹¹. The city was catastrophically inundated and buried under the Pacific, only to be heaved up to its present 12,500-foot altitude during the next cataclysm 7,000 years ago¹².
- **Amazon basin:** Was an inland sea called the "Sea of Xarayes"¹³.
- **Sudan Basin, Africa:** The location that shifted to the North Pole during the cataclysm 11,500 years ago¹⁴.

Key Events & Stories:

This chapter describes the author's reconstruction of the world as it was just before the cataclysm of 11,500 years ago, and the cataclysm itself. The pre-cataclysmic world had a different geography, with the North Pole in Hudson Bay and large continents in the Atlantic and Pacific¹⁵¹⁵¹⁵¹⁵¹⁵¹⁵¹⁵¹⁵. This era hosted highly advanced civilizations: the Hellenes in Greece had unmatched science and law¹⁶; Tiahuanaco in South America was a major seaport with advanced astronomy¹⁷¹⁷¹⁷¹⁷; and India possessed gravity-propelled vehicles¹⁸¹⁸.

Around 9,550 B.C. (11,500 years ago), the 60-mile thick shell of the Earth shifted its position in a quarter to half a day¹⁹. The North Pole moved from Hudson Bay to the Sudan Basin in Africa²⁰. As the crust shifted, the atmosphere and oceans continued their momentum, creating supersonic hurricanes and flooding most of the Earth's lands²¹²¹. Continents were subjected to massive upheavals and earthquakes, creating huge new mountain ranges like the Andes and Rockies²²²²²². The molten sub-layer broke through the surface, an event remembered as "earth-fire"²³. Less than one percent of all life survived²⁴. The former polar ice caps, now at the equator, melted at tremendous speeds, raising the world's oceans by 200 to 300 feet and shrouding the Torrid Zone in fog for generations²⁵. This event marked the

end of the Laurentian Ice Age and plunged the survivors into the "old stone age"²⁶.

Key Concepts & Esoteric Knowledge:

- **Advanced Prehistoric Civilizations:** The chapter posits the existence of civilizations 11,500 years ago that were scientifically superior to our own, possessing technologies like telescopes, orbiting satellites, and gravity-based propulsion²⁷²⁷²⁷²⁷.
- **Pole Shift Mechanism:** The event is described as a physical slip of the Earth's 60-mile thick outer shell²⁸. This shift takes place in a fraction of a day²⁹.
- **Creation of Geological Features:** The cataclysm is presented as the force that created major modern geological features, such as the Andes and Rocky Mountains³⁰, and buried ancient continents.
- **Earth-Fire:** The concept of the molten layer beneath the Earth's crust breaking through to the surface during the cataclysm, a literal hell experienced by the survivors³¹.
- **Origin of the Stone Age:** The destruction was so complete that the few survivors were stripped of all technology and forced into a primitive existence, initiating what we now call the "old stone age"³².

Alleged Time Stamps or Historical Periods:

- **18,500 to 11,500 years ago:** The era when the North Pole was located in the Hudson Bay³³.
- **11,500 years ago (9,550 B.C.):** The date of the cataclysmic pole shift that is the subject of the chapter³⁴.
- **1/4 to 1/2 a day:** The duration of the physical shift of the Earth's shell³⁵.
- **Six days:** The length of time the oceans and winds took to resolve their "holocaustic wars" after the initial shift³⁶.
- **Seventh day:** The day the oceans and atmosphere began to settle down³⁷.

Direct Quotes of Significance:

- "About 11,500 years ago in 9,550 B.C., as dated by astronomers from Potsdam Observatory from writings in the ruins of Tiahuanaco the 60-mile thick shell of the Earth shifted its position once more in 1/4 to 1/2 a day, about 7,000 years after the

previous shift"³⁸.

- "The two-mile thick ice caps of the Laurentian Basin and the Indian Ocean, having shifted from their polar homes and started a new course of revolving equatorially, proceeded to melt at tremendous speeds in the torrid heat, carving great grooves in the mountains as the rushing, gushing, swirling water and ice overwhelmed everything in their paths"³⁹.

Of course. Here is the analysis for Chapter 5.

Chapter 5: Genesis

Key Characters Introduced or Mentioned:

- **God:** The creator of the universe in the beginning, whose design and will allows for the survival of life and the re-establishment of the world after the cataclysm¹¹¹¹¹¹.
- **Adam:** A man who lived on the mother continent of Eden². His first mate died after giving birth to their child³. He then raised this child, his daughter, by himself⁴⁴. He is warned by his daughter of the coming destruction and leaves Eden with her to survive⁵⁵⁵⁵. After the cataclysm, he makes her his wife⁶.
- **Eve:** The daughter of Adam, born from his first, deceased mate⁷. She inherits the wisdom of her ancestors, foresees the impending cataclysm, and convinces her father to leave the doomed motherland⁸. She is made Adam's wife after the inundation, becoming the "mother of all living from the motherland"⁹.

Key Locations Mentioned:

- **Eden:** Described as a mother continent established eastward where the man (Adam) lived¹⁰. It is the "seat of wisdom, of all knowledge, both good and evil"¹¹¹¹. Adam is warned that if he stays on this motherland, he will surely die¹²¹². It is ultimately destroyed by earthquake, fire, and inundation¹³.
- **The Four Lands/Rivers:** The lands near the rivers Pison, Gihon (Ethiopia), Hiddekel (Assyria), and Euphrates are mentioned as the "offspring lands" of Eden¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴. The author notes these descriptions are likely incorrect or

incomplete¹⁵.

Key Events & Stories:

This chapter is a complete "translation-interpretation" of Genesis chapters I, II, and III, recasting the narrative as an account of global cataclysm, not creation from nothing. The story begins by separating the original creation of the Earth (4.32 billion years ago) from the events of Genesis, which are dated to the cataclysm of 11,500 years ago¹⁶.

The "seven days of creation" are re-told as seven days of the Earth's recovery from the catastrophe:

- **Day 1-2:** The storms abate, sunlight returns, and the sky is re-established between the clouds and the muddy oceans¹⁷¹⁷¹⁷¹⁷.
- **Day 3-4:** The settling floodwaters drain off the high ground, revealing dry land, and as the post-cataclysm fog lifts, the Sun, Moon, and stars reappear¹⁸¹⁸¹⁸¹⁸.
- **Day 5-6:** The animal and human survivors of the inundation are noted—whales, fowl, cattle, and finally "the man," who was created in God's image in the original creation¹⁹¹⁹¹⁹¹⁹.
- **Day 7:** The recovery is complete, bringing a "rest from the fight for survival"²⁰.

The specific story of Adam and Eve is then reinterpreted. Adam's mate had died after giving birth to a daughter, Eve, whom Adam raised²¹²¹²¹. The "woman" (Eve), possessing inherited wisdom, knew the motherland of Eden was doomed and warned Adam²². They departed, and Eden was destroyed by "earthquake and earth-fire," losing its foundations and sinking beneath the ocean²³. After the catastrophe, Adam makes Eve his wife, as she is the designated mother of all future generations from their homeland²⁴.

Key Concepts & Esoteric Knowledge:

- **Genesis as Re-genesis:** The central concept is that the seven-day account in Genesis is not about the Earth's original creation but its *re-establishment* and recovery in the week following the global cataclysm of 11,500 years ago²⁵.
- **Cataclysmic Language:** Words from the Bible are re-translated to fit the cataclysm narrative. "Without form and void" becomes "inundated with raging waters, and

ravaged by horrendous winds"²⁶. The "mist" that watered the ground becomes "great inundations"²⁷.

- **Eden as a Lost Motherland:** Eden is not a perfect garden but an ancient, inhabited mother continent that was the source of all wisdom but was fated for destruction²⁸²⁸²⁸²⁸.
- **Eve as Adam's Daughter:** The story of the "rib" is reinterpreted as a story of lineage. The text states Adam's first mate died, leaving him with a daughter, Eve²⁹. Their subsequent union is an act of necessity for survival, not a sin³⁰.
- **No Original Sin:** The concept of a "fall from grace" is entirely absent. Eve's actions are driven by wisdom and the will to survive³¹. Eating the "fruit" is reinterpreted as being a descendant of the original people of the motherland³².

Alleged Time Stamps or Historical Periods:

- **4.32 Billion Years Ago:** The date given for the original creation of the universe and Earth³³.
- **11,500 Years Ago:** The date of the specific cataclysm this "Regenesis" story describes³⁴.
- **The Seven Days:** Interpreted as seven literal days of the planet's recovery immediately following the cataclysm³⁵.

Direct Quotes of Significance:

- "And during one of the many cataclysms that occurred during the earth's history (this one being 11,500 years ago), the earth's lands were all inundated with raging waters, and ravaged by horrendous winds; and the oceans were all dark with muddiness"³⁶.
- "And Adam said, this child is bone of my bone, and flesh of my flesh; and she grew into womanhood. Therefore, the man was both father and mother to her, and she abode with him, and they were one flesh"³⁷³⁷³⁷³⁷.

Of course. Here is the analysis for Chapter 6.

Chapter 6: CATAclysms REVISITED

Key Characters Introduced or Mentioned:

- **Noah (Utnapishtim):** The survivor of the last cataclysm, known as Noah's flood¹¹¹. His story was found on tablets from the library of Assurbanipal, where he is called Utnapishtim². He gives a first-hand account of the flood³.
- **Adam and Eve:** The survivors of the cataclysm from two cycles ago, which occurred roughly 10,500 or 11,500 years ago and initiated the Old Stone Age⁴⁴⁴⁴⁴⁴⁴⁴⁴.
- **Georges Cuvier:** A pioneering scientist who discovered that fossil bones showed different species being suddenly wiped out and replaced by new ones in subsequent strata⁵⁵⁵⁵.
- **Ivan T. Sanderson:** A biologist who approached the problem of the frozen Beresovka mammoth from a frozen foods viewpoint, concluding no known process in nature could explain the phenomenon⁶⁶⁶⁶.
- **Gilgamesh:** A legendary king of Erech who sought out Utnapishtim (Noah) to learn the secret of eternal life and heard the story of the great deluge firsthand⁷⁷⁷⁷.
- **Hans Schindler Bellamy and Peter Allan:** Researchers whose work on the Calendar Gate and Great Idol of Tiahuanaco is cited as evidence of the city's great antiquity and destruction in past cataclysms⁸.

Key Locations Mentioned:

- **Tiahuanaco, Bolivia:** A prehistoric city presented as having existed at sea level before being submerged by the Pacific in the cataclysm 11,500 years ago, only to be heaved up to 12,500 feet during the cataclysm 7,000 years ago⁹.
- **Beresovka River, Siberia:** The location where a quick-frozen mammoth was found around 1900, with buttercups still in its mouth¹⁰¹⁰¹⁰. Its state of preservation is used as key evidence for a sudden, catastrophic freeze¹¹¹¹¹¹¹¹¹.
- **Grand Canyon, Monument Valley, Canyon de Chelly:** The homogenous, sharply demarcated strata in the walls of these canyons are presented as evidence that the layers were deposited "all at once" by supersonic, muck-filled water during cataclysms¹²¹²¹²¹²¹²¹²¹²¹².
- **Shanidar Cave, Iraq:** An archaeological site where Carbon-14 dating of layers aligns with the dates of the last four cataclysms¹³¹³¹³¹³. No carbon was deposited during

the Caspian Sea Polar Era, suggesting the cave was sealed under an ice cap¹⁴.

- **Niagara Falls and St. Anthony's Falls:** The gorges below these falls are used as geological "time-clocks"¹⁵. Their approximate age of 7,000 years is used to date the last cataclysm (Noah's flood)¹⁶¹⁶¹⁶¹⁶.
- **Jura Mountains, France:** The location of huge granite blocks that were transported 50 to 80 miles from the Alps by fantastically fast-moving water during a cataclysm¹⁷¹⁷¹⁷¹⁷¹⁷¹⁷¹⁷¹⁷.
- **Nineveh:** The ancient city discovered by Austen Henry Layard, where the library of Assurbanipal containing the Epic of Gilgamesh tablets was found¹⁸¹⁸¹⁸¹⁸.

Key Events & Stories:

This chapter revisits and expands on the physical evidence for a series of global cataclysms. The narrative is structured as a scientific investigation, presenting various pieces of evidence as "fingerprints" left by the "cataclysmic giant hand"¹⁹.

One central story is the scientific analysis of the

Beresovka mammoth²⁰. The author recounts how the mammoth was found quick-frozen in muck with undigested food in its stomach²¹²¹²¹²¹. Quoting research from the American Frozen Foods Institute, he argues that no known natural or artificial process could freeze a multi-ton animal fast enough (less than four hours) to prevent the formation of large ice crystals in its deep tissues, making its preservation a miracle of "supernatural violence"²²²²²²²²²²²²²²²²²².

Another key event is the discovery of the

Epic of Gilgamesh in the ruins of Nineveh²³²³²³²³. The author presents the story of Utnapishtim (Noah) as a first-hand, eyewitness account of the last cataclysm²⁴. Utnapishtim describes the skies darkening, a six-day storm of wind and flood, and the aftermath where "all mankind was turned into mud"²⁵²⁵²⁵²⁵²⁵²⁵²⁵²⁵. This is cross-referenced with the work of archaeologist Leonard Woolley, who found a nine-foot-thick layer of clay from this flood in the same region²⁶.

Key Concepts & Esoteric Knowledge:

- **Uniformitarian Geology vs. Cataclysmology:** The chapter argues that these two disciplines are not in conflict but complement each other²⁷. Uniformitarianism describes the normal, slow processes between cataclysms, while cataclysmology explains the sudden, violent events that create the major geological strata²⁸.
- **Homogeneity Factor:** The author argues that the perfectly even and homogenous nature of the sedimentary layers in places like the Grand Canyon proves they could only have been deposited "all at once" by vast amounts of fast-moving water²⁹.
- **Sloshing Evidence:** In Monument Valley, thick strata are composed of many diagonal sublayers tilted in opposing directions³⁰. This is presented as proof of muck-filled water "sloshing" back and forth in a basin during a cataclysm, depositing a sublayer with each pass³¹.
- **Earth-Fire and Fissures:** The author describes a mountainside at Mexican Hat where all the strata are bent downwards into the riverbed³². This is interpreted as evidence of a massive fissure opening in the Earth's crust during a cataclysm, exposing the molten layer below, which melted the mountain's foundations and allowed the supersonic ocean to drive the softened rock into the fissure³³³³³³³³³³³³³³³³³³³³.
- **Cataclysms and Stone Ages:** The chapter directly links the "New Stone Age" to the aftermath of Noah's flood (7,000 years ago) and the "Old Stone Age" to the aftermath of Adam and Eve's flood (11,500 years ago)³⁴³⁴³⁴³⁴³⁴³⁴³⁴³⁴. The destruction is so total that it forces the few survivors into a primitive existence³⁵³⁵³⁵³⁵.

Alleged Time Stamps or Historical Periods:

- **7,000 years ago:** The date of the last cataclysm (Noah's Flood) and the beginning of the New Stone Age³⁶³⁶³⁶³⁶³⁶³⁶³⁶³⁶.
- **11,500 years ago (or 10,500):** The date of Adam and Eve's flood, which began the Old Stone Age³⁷³⁷³⁷³⁷³⁷³⁷³⁷³⁷.
- **18,500 years ago:** The date of the cataclysm preceding Adam and Eve's³⁸³⁸³⁸³⁸.
- **29,000 years ago:** The date of the cataclysm that ended the Wisconsin glacial era³⁹³⁹³⁹³⁹.
- **43,800 years ago:** The date derived by mathematician Jess Hale for the fifth-to-last

cataclysm⁴⁰ .

Direct Quotes of Significance:

- "Each cataclysm is like a giant hand sweeping across the countryside, leaving its fingerprints for us to find amongst the elephant footprints of science in our search for the solution to this consuming mystery"⁴¹ .
- (Quoting Utnapishtim's account) "For six days and nights Wind and flood marched on, The holocaustic wind overwhelmed the land. When the seventh day dawned, The ill wind was stilled; the oceans, - the flood - Which had waged war like an army, was ceas⁴² ed"⁴³ .

Of course. Here is the analysis for the "Conclusion" chapter.

Chapter 7: Conclusion

Key Characters Introduced or Mentioned:

- **Indra:** The King of the Gods in a Hindu legend who, after a victory, desires to build an endlessly magnificent palace¹¹¹¹ .
- **Visvakarman:** The divine architect and "god of works and arts" who grows exhausted by Indra's insatiable demands²²²² .
- **Brahma and Vishnu:** The Creator and Supreme Being in the Hindu pantheon, to whom Visvakarman appeals for help³ .
- **A young Brahman:** A messenger of Vishnu who appears before Indra to teach him a lesson about cosmic cycles⁴ .
- **Solon:** The Athenian statesman to whom an Egyptian priest explains the cyclical nature of destruction and the loss of historical memory⁵ .
- **An Egyptian Priest:** An unnamed figure who speaks to Solon, explaining that the Greeks are "but children" in their historical knowledge because their civilizations are repeatedly wiped out by cataclysms, unlike in Egypt where records are kept⁶ .

Key Locations Mentioned:

- **The Central Mountain:** The location of Indra's celestial dwelling in a Hindu legend⁷⁷ .
- **Egypt:** Presented in a quote from Plato's *Timaeus* as an ancient land that preserves

records of past worlds and cataclysms in its temples, unlike Greece⁸.

- **Greece (Land of the Hellenes):** Described by the Egyptian priest as a land whose people are like "children" because their memory is repeatedly wiped clean by deluges, forcing them to start over again without knowledge of the ancient past⁹⁹.

Key Events & Stories:

This chapter does not contain a narrative from the author but instead concludes the book with three allegorical passages from historical and religious texts to underscore the main themes.

1. **The Story of Indra (from the *Brahmavaivarta Purana*):** After defeating a Titan, King Indra demands an ever-grander palace from his divine architect, Visvakarman¹⁰¹⁰¹⁰¹⁰. Exhausted, the architect complains to Brahma and Vishnu¹¹. Vishnu sends a young Brahman to Indra, who explains that he has seen worlds "arise and vanish again" and that countless Indras, Vishnus, and Brahmas have existed in an endless succession of cycles¹². This story serves as a parable for the insignificance of one king or one era in the face of immense cosmic time and recurring destruction.
2. **The Priest's lesson to Solon (from Plato's *Timaeus*):** An Egyptian priest tells the Greek lawgiver Solon that the Hellenes are like children because their history is constantly erased by "earth-fire and inundation"¹³. The priest explains that Egypt, by contrast, keeps ancient records of these events and of the "fairest and noblest race of men that ever lived," of whom the current Greeks are but a "seed or remnant"¹⁴¹⁴. This reinforces the idea of lost, superior ancient civilizations and recurring cataclysms.
3. **A Verse from Psalm 46:** The chapter ends with a direct quote from the Bible: "Therefore will not we fear, though the earth be removed, and though the mountains be carried into the midst of the sea..."¹⁵. This serves as a final, spiritual reflection on facing cataclysmic upheaval without fear.

Key Concepts & Esoteric Knowledge:

- **Cyclical Nature of Existence:** The story of Indra illustrates the Hindu concept of cosmic cycles (Yugas or Kalpas), where universes and gods are endlessly created and destroyed¹⁶. The author uses this to frame earthly cataclysms as part of a much larger pattern.
- **Cataclysmic Amnesia:** The dialogue between Solon and the Egyptian priest

introduces the concept of civilizational amnesia¹⁷. Cataclysms are so total that they destroy not only people and cities but also records and collective memory, leaving survivors "destitute of letters and education" to begin again "as children"¹⁸.

- **Lost Races and Ancient Wisdom:** The priest's words to Solon allude to a "fairest and noblest race of men that ever lived" in the distant past, of whom modern humans are but a degraded remnant¹⁹. This supports the book's theme of superior prehistoric civilizations.
- **Spiritual Fortitude:** The concluding Psalm suggests that faith provides the strength to face the complete destruction of the known world without fear²⁰.

Alleged Time Stamps or Historical Periods:

- This chapter deals with mythological and legendary time, referring to "Cycles, past counting in their numbers" and multiple deluges preceding the one remembered by the Greeks²¹²¹²¹.

Direct Quotes of Significance:

- "I have seen the world arise and vanish, arise and vanish again, like a tortoise's shell coming out of Infinite ocean and sinking back. I was present at the dawn and twilight of the Cycles, past counting in their numbers..."²².
- "O Solon, Solon, you Hellenes are but children.... There is no old doctrine handed down among you by ancient tradition nor any science which is hoary with age, and I will tell you the reason behind this. There have been and will be again many destructions of mankind arising out of many causes, the greatest having been brought about by earth-fire and inundation"²³.

I have completed the analysis of the main chapters of "The Adam and Eve Story." The following chapter is from the second book included in the file, "Aftermath of the Adam and Eve Story." Here is the analysis.

Chapter 1 (of *Aftermath*): Our Precursor

Key Characters Introduced or Mentioned:

- **The Author (Chan Thomas):** He recounts his personal research from 1967-68 into the effects of low-density magnetic fields on human physiology¹.
- **Scientists at Hahnemann Medical College:** Researchers who experimentally verified

the author's theoretical work by studying mice in low-density magnetic fields²²²².

Key Locations Mentioned:

- **Hahnemann Medical College (Philadelphia):** The location where the pivotal experiment on mice in low-density magnetic fields was conducted³³³³.
- **The author's proposed survival retreat:** A location on the eastern side of a high mountain peak, with concrete walls and ceiling up to four feet thick⁴⁴⁴⁴.

Key Events & Stories:

The chapter narrates a personal story from the author's past to explain the period leading up to a cataclysm. In 1967-68, the author conducted research predicting that the low-density magnetic fields of outer space would cause astronauts' protein structures to break down and lead to widespread cancer after about three months⁵⁵⁵⁵. His work was filed away until he read about an experiment at Hahnemann Medical College that had proven his predictions correct using mice⁶⁶⁶⁶.

The scientists then revealed an unpublished result: the mice in the low-magnetic-field environment had turned "criminal," engaging in cannibalism and constant forcible rape, despite having adequate food⁷⁷⁷⁷⁷⁷. The author connects this behavior to the weakening of Earth's magnetic field during the "precursor" period before a cataclysm, which he believes causes a rise in criminality and a loss of empathy in humans⁸⁸⁸⁸⁸. The chapter concludes with stark, practical advice for survival, emphasizing the need to prepare a mountain retreat and be ready to defend one's family and supplies from desperate and violent people when law and order inevitably break down⁹⁹⁹⁹.

Key Concepts & Esoteric Knowledge:

- **The Precursor:** This is the period leading up to a cataclysm, defined by the measurable, accelerating decrease in the Earth's magnetic field strength as the solar system approaches a galactic "null zone"¹⁰¹⁰¹⁰¹⁰.
- **Magnetic Fields and Behavior:** The central concept is that a weakening magnetic field has a profoundly degenerative effect on morality. It induces a "sense of impending doom" that causes those without empathy to turn criminal first¹¹¹¹¹¹¹¹¹¹¹¹¹¹¹¹. This is presented as the cause for the staggering worldwide

rise in crime, particularly rape¹²¹²¹²¹².

- **Monitoring the Magnetic Field:** The author provides a method for individuals to monitor the precursor themselves. By using a high-quality magnetic compass and a stopwatch to time how long the needle takes to settle, one can detect when the Earth's magnetic field has decreased to a critical level, signaling that the cataclysm is imminent¹³¹³¹³¹³¹³¹³¹³¹³.
- **Survivalism and Self-Defense:** The chapter strongly advocates for preparing for the total collapse of society. It states that law enforcement will be unable to cope and that survivors will have to protect their families and supplies from "marauding gangs" and desperate neighbors who "will kill you to get it"¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴¹⁴. The decision to use lethal force must be instantaneous, as waiting to confirm an evil intent will be fatal¹⁵.

Alleged Time Stamps or Historical Periods:

- **1967-68:** The time of the author's research on magnetic fields and the confirming experiment at Hahnemann Medical College¹⁶.
- **By 1990:** The author claims he predicted in the 1960s and 1970s that crime would reach a level that law enforcement could not cope with by this year¹⁷.

Direct Quotes of Significance:

- "The first thing they told me was that the mice turned criminal in their low-density magnetic field environment"¹⁸.
- "Those who have not prepared for a cataclysm far outnumber those who have. Those who have not will want what you have, and will kill you to get it. Both shortly before and after the cataclysm"¹⁹.

Of course. Here is the analysis for the next chapter.

Chapter 2 (of *Aftermath*): Evolution

Key Characters Introduced or Mentioned:

- **Georges Cuvier:** The pioneering paleontologist is mentioned again. The author states that Cuvier, without realizing it, discovered the evidence of cataclysmic mutations when he noted that species in one geological layer were suddenly wiped out and

replaced in the next layer by new species with no apparent ancestors¹.

Key Locations Mentioned:

- **UCLA Experimental College:** The author mentions teaching his course on ESP here to 560 students over four quarters².

Key Events & Stories:

This chapter is an essay arguing that the modern "Theory of Evolution" is a flawed hypothesis because it fails to account for cataclysms³. The author first defines the proper "Scientific Process" (hypothesis -> theory -> law) and uses his own successful development of a testable law for ESP as an example⁴⁴⁴⁴.

He then argues that the theory of evolution fails this process for two reasons. First, it assumes a gradual improvement of species, which the author counters by claiming we are witnessing a "gradual degradation," citing the rise of diabetes, decreasing intelligence levels, and widespread tooth decay⁵⁵⁵⁵⁵⁵⁵⁵.

Second, and more centrally, he argues that evolution ignores the primary engine of change: sudden, massive mutation caused by cataclysms. During a cataclysm, the Earth's protective atmospheric shield is disrupted, allowing deadly cosmic rays to bombard the handful of survivors⁶⁶⁶⁶. This bombardment causes widespread, random, and overwhelmingly

degenerative genetic mutations in the next generation⁷⁷. The offspring are so different from their parents that they appear in the fossil record as entirely new species, explaining Cuvier's findings⁸. The author concludes that gradual evolution from a single cell is a mathematical impossibility and that humanity must be the result of an original "design"⁹.

Key Concepts & Esoteric Knowledge:

- **The Scientific Process:** The author defines this as a strict progression: a testable **hypothesis** must be proven to become a **theory**, which must then be shown to be predictable to become a **law**¹⁰. He claims the theory of evolution has not passed these steps¹¹.
- **Cataclysmic Mutation:** This is the chapter's core concept. The author posits that evolution is not a gradual process but occurs in sudden, catastrophic leaps. During a cataclysm, cosmic rays bombard survivors, causing massive genetic mutations in their

offspring¹².

- **Degradation of the Species:** The author argues against the idea of evolutionary improvement, stating that humans show evidence of genetic degradation over time¹³. The offspring from cataclysmic mutations represent a "sudden degradation of the genes"¹⁴.
- **The Cosmic Ray Shield:** The Earth's high-altitude atmosphere is described as a shield that protects life from deadly cosmic rays¹⁵. This shield is disrupted during a cataclysm, allowing the rays to penetrate to the surface and cause mutations¹⁶.
- **Humans as a "Design":** The author concludes that applied mathematics proves it is "utterly impossible" for humans to be the result of gradual evolution from a single cell¹⁷. Therefore, humanity must be the product of an original "design and resulting productions of two variations of that design: male and female"¹⁸.

Alleged Time Stamps or Historical Periods:

- This chapter does not refer to specific dates or historical periods, focusing instead on the theoretical process of evolution.

Direct Quotes of Significance:

- "By all scientific measurements, the 'Theory of Evolution' is but a rank, raw hypothesis, based on two counts"¹⁹.
- "Cuvier noted that the species found in one strata seemed to be totally wiped out, suddenly, by the deposit of the strata in which they were found, and the next upper strata would contain new species with no antecedents whatsoever. Without realizing it, he had discovered the mutations of species caused by cataclysms"²⁰.
